

# Visual Arts Designation

Kallie William

# Artist Statement

While brainstorming for my concentration, I explored different topics and how I could connect them to a deeper meaning. I wanted to create something that demonstrated my interests while also making a statement. I settled on combining my love for nature with my fascination for the occult and mythological creatures. Through my works I wanted to display and explore environmental concerns with a fantasy twist. By doing this, I hoped that my pieces would be able to stand out among other environmental works and highlight prevailing environmental issues.
